NexaWorks

Balanced delivery. Lasting partnership.

Response to MRG-RFP-2026-014: Customer Service Platform Modernisation
Prepared for Meridian Retail Group (fictional)

1. Executive Summary and Understanding of the Requirement

NexaWorks welcomes the opportunity to respond to RFP MRG-RFP-2026-014. Our understanding is that Meridian Retail Group needs a single omnichannel service platform for 1,200 agents, growing to 3,000, integrated with Salesforce CRM, SAP S/4HANA and Genesys, delivered with minimal disruption to store and online customers.

Our proposal balances capability, cost and delivery certainty, and puts particular emphasis on a low-risk implementation and a strong long-term support model.

2. Proposed Solution and Technical Approach

We propose a modular, cloud-hosted platform built on a service-oriented architecture with an API gateway and REST APIs. Core modules cover case management, omnichannel routing (voice, chat, email, WhatsApp), knowledge management and reporting.

We provide connectors for Salesforce CRM and Genesys Cloud. SAP S/4HANA integration is delivered through SAP's standard OData services; an integration specification is produced in the design phase. The platform scales horizontally and supports 3,000 concurrent agents with autoscaling.

3. Implementation Approach, Timeline, Team and Milestones

Delivery follows a phased 20-week plan with 8 weeks of hypercare after go-live.

Phase 1 Discovery (weeks 1-3): current-state assessment and requirements sign-off. Phase 2 Design (weeks 4-6): solution design and integration specification. Phase 3 Build (weeks 7-13) in two-week sprints with sprint demos. Phase 4 Test (weeks 14-17): system integration testing, performance testing and user acceptance testing (UAT). Phase 5 Pilot and Rollout (weeks 18-20): pilot with 150 agents, then rollout in three waves.

Milestones: M1 requirements sign-off (week 3), M2 design sign-off (week 6), M3 build complete (week 13), M4 UAT sign-off (week 17), M5 pilot go-live (week 18), M6 full go-live (week 20).

Team structure: engagement director, delivery manager, solution architect, integration lead, five engineers, two QA engineers, a change manager and a trainer. A RACI matrix is included in Annex B.

Risk management: a risk register with owners and mitigation actions is reviewed weekly. Top risks and mitigations: SAP data quality (mitigation: data profiling in Discovery), agent adoption (mitigation: pilot and train-the-trainer), peak-season freeze (mitigation: go-live scheduled before the festive code freeze). A rollback plan is defined for each rollout wave.

4. Commercial Proposal

Item	Price (USD)
Platform subscription (3 years, 1,200 agents)	$540,000
Implementation services (fixed price)	$250,000
Integration (Salesforce, SAP, Genesys)	$60,000
Training, change management and hypercare	$40,000
Total contract value (3 years)	**$890,000**

Pricing assumptions

Prices exclude taxes. Implementation is a fixed price for the scope in Section 2; changes follow a change control process with a published day rate of $900. Subscription is billed annually. Payment milestones are tied to M2, M4 and M6. Total cost of ownership over three years is shown above with no hidden fees.

5. Security, Compliance and Risk Controls

NexaWorks is ISO/IEC 27001 certified and holds a SOC 2 Type I report; our SOC 2 Type II audit is in progress.

Data is encrypted at rest (AES-256) and in transit (TLS 1.2+). Access uses SSO with SAML 2.0, role-based access control and multi-factor authentication. Audit logs are retained for 12 months.

We comply with GDPR and the DPDP Act 2023 and host data in India. Penetration testing is carried out annually by an independent firm.

6. Support Model, Relevant Experience and References

Support is 24x7x365 with a tiered L1/L2/L3 model and a dedicated customer success manager.

SLA response times: P1 15 minutes, P2 1 hour, P3 4 hours, P4 1 business day, with service credits if targets are missed. Quarterly service reviews and a shared knowledge base are included.

Relevant experience: seven contact-centre implementations for retail and consumer brands since 2019, including two with SAP S/4HANA integration.

References: Lakeside Home Stores (VP Customer Experience), Crescent Fashion (CTO) and Pinecrest Grocers (Head of IT). Contact details are provided in Annex D.
